

JOSHUA LONG

Junior Data Analyst | SQL | Excel | Power BI | Data Visualization

Jacksonville, FL | [904-347-1778] | [longj0317@hotmail.com] | [www.linkedin.com/in/joshua-long-9648a4407] | [<https://joshua-long.github.io/Joshua-Portfolio/>]

PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on training in SQL, PostgreSQL, Excel, Power BI, data visualization, data cleaning, and statistical analysis through DataCamp and Google Data Analytics Professional Certificate coursework on Coursera. Experienced in analyzing datasets, identifying trends, answering business questions, and communicating findings through clear visualizations.

Brings 7+ years of customer-facing and operational experience at Cracker Barrel, developing strong problem-solving, communication, time-management, and attention-to-detail skills in a fast-paced business environment. Currently building a portfolio of data analytics projects demonstrating the ability to turn raw data into actionable business insights.

TECHNICAL SKILLS

Data Analysis: Data Cleaning, Data Validation, Exploratory Data Analysis (EDA), Trend Analysis, Data Quality, Business Analysis

SQL & Databases: SQL, PostgreSQL, SELECT, WHERE, GROUP BY, ORDER BY, Aggregate Functions, CASE Statements, Conditional Aggregation, Date Functions, JOINS, Subqueries

Visualization & BI: Power BI, Dashboards, Data Visualization, Charts, KPI Reporting

Spreadsheets: Microsoft Excel, Google Sheets, Formulas, Sorting & Filtering, Data Organization, Pivot Tables

Statistics: Descriptive Statistics, Data Distributions, Averages, Percentages, Quartiles, Box Plots, Basic Statistical Analysis

Professional: Problem Solving, Critical Thinking, Customer Communication, Team Collaboration, Time Management, Attention to Detail

DATA ANALYTICS PROJECTS

Motorcycle Parts Wholesale Sales Analysis | SQL / PostgreSQL

DataCamp Portfolio Project | Portfolio / GitHub

- Analyzed wholesale motorcycle-parts transaction data across three warehouses using PostgreSQL to evaluate revenue performance by product line, warehouse, and month.
- Used SQL aggregation, filtering, GROUP BY, CASE statements, conditional aggregation, and date functions to answer business-focused questions.
- Compared warehouse and product-line performance and analyzed month-to-month wholesale net revenue trends.
- Investigated an approximately 25% increase in August wholesale revenue to identify the product categories contributing most to the increase.
- Extended the original project with independently developed questions examining warehouse performance, product performance, monthly trends, and payment-fee impact.

Tools: PostgreSQL, SQL, DataCamp DataLab, Jupyter Notebook

Additional Analytics Coursework & Projects

- Cleaned and organized datasets to improve accuracy and usability for analysis.
- Used spreadsheets and SQL to explore datasets and answer structured business questions.
- Created charts and visualizations to identify trends, patterns, and relationships.
- Applied data-quality principles to identify incomplete, inconsistent, or inaccurate information.

PROFESSIONAL EXPERIENCE

Cracker Barrel Old Country Store

Server / Customer Service Professional | Jacksonville, FL | 7+ Years

- Manage a high volume of customer transactions while maintaining accuracy, organization, and service quality in a fast-paced environment.
- Identify customer and operational needs in real time and make quick, data-informed decisions based on demand, timing, and available resources.
- Process payments and maintain accuracy across customer orders, receipts, and transaction information.
- Recognize patterns in customer traffic, sales activity, and peak operating periods to prioritize workload efficiently.
- Coordinate with multiple team members across front- and back-of-house operations to maintain efficient service.
- Resolve customer concerns through active listening, problem solving, and clear communication.
- Balance multiple priorities simultaneously while maintaining strong attention to detail.
- Communicate effectively with people from different backgrounds, a transferable skill for presenting analytical findings to non-technical stakeholders.

EDUCATION & PROFESSIONAL DEVELOPMENT

Google Data Analytics Professional Certificate

Coursera - In Progress

Relevant training: Data-driven decision making, spreadsheet analysis, data cleaning and integrity, data visualization, SQL, data analysis processes, business problem solving, data presentation and communication, Power BI / Business Intelligence concepts

DataCamp

Hands-on training in SQL, PostgreSQL, relational databases, database tables, data manipulation, data analysis, data visualization, introductory statistics, data quality, and analytical problem solving. Completed interactive exercises and portfolio-style projects using real-world datasets and business scenarios.

CERTIFICATIONS

DataCamp Data Analytics Coursework & Certificates - DataCamp

Google Data Analytics Professional Certificate - Coursera / Google - In Progress

ADDITIONAL EXPERIENCE

Real Estate Education

Florida Real Estate Coursework - Coursework involving real estate transactions, contracts, finance, property valuation, market analysis, and mathematical calculations. Developed experience interpreting financial information, comparing property values, calculating commissions, and evaluating market-related data.

CORE STRENGTHS

Analytical problem solving | Quantitative reasoning | Pattern and trend identification | Clear communication | Stakeholder-facing skills | Accuracy under pressure | Self-directed learning
